

Table 1: Indication for CS (caesarean section) deliveries

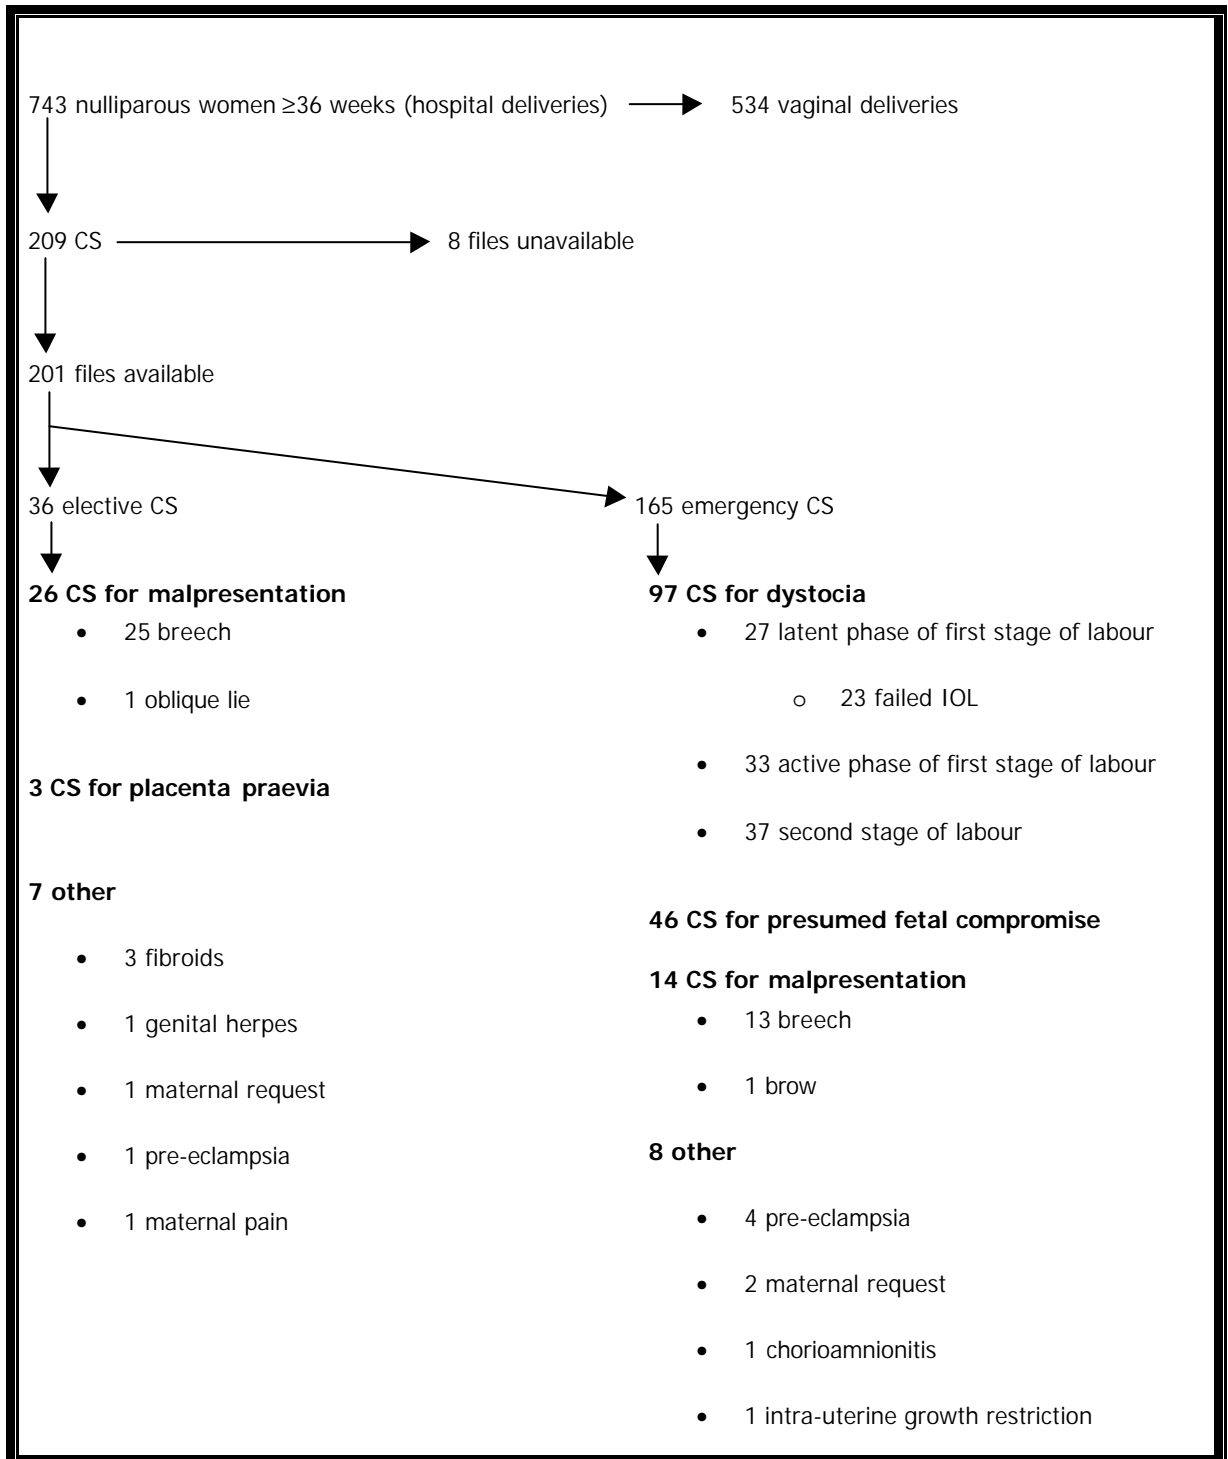

Table 2. CS (caesarean section) for dystocia

Standard	Number of cases	Percent
(1) Oxytocin for failure to progress in labour (IOL excluded)	65/74	88%
(2) Duration of oxytocin infusion during latent phase of labour (including IOL)		
▪ <6 hours	3/21	14%
▪ ≥6 hours <9 hours	13/21	62%
▪ ≥9 hours <12 hours	4/21	19%
▪ ≥12 hours	1/21	5%
(3) Duration of oxytocin for failure to progress during established labour		
▪ no oxytocin	1/33	3%
▪ <4 hours or no oxytocin	17/33	52%
▪ ≥4 hours <6 hours	8/33	24%
▪ ≥6 hours <8 hours	8/33	24%
▪ ≥8 hours	1/33	3%
(4) Failure to progress in second stage of labour (duration of second stage + oxytocin for some time)		
▪ ≥2 hours	24/37	65%
▪ ≥3 hours	12/37	32%
